Jeffrey has done it again! I read his last book on online commerce which prompted me to get this one. Absolutely brilliant - and written in such simple to understand language. Until now, I haven't sold much on Craigslist. I've always been skittish as there are so many scammers on it. Mr. Dennis book taught me how to spot the scammers quickly and avoid wasting time with them. Craigslist can be a powerful buying and selling tool if you know how to get the most out of it. I still have a lot to learn, but this book has taught me how to maximize Craigslist experience and how to avoid the pitfalls. Plus it's written in a style that you don't need to be a techie to understand. Great job!" (5 Star) Danny I found this book through an online forum that I belong to. The author clearly has experience doing

what he says in his book. The book is excellently written, very organized, and thorough from start to finish. The author's very personal style and approach to selling really shines through. All of those personal tips and tricks make the book a worthwhile read. I read it easily from cover to cover in just a little time. Now time to take action! I've already listed an old washer dryer set and Jeff's tips on listing definitely helped make it look more appealing. I don't normally write reviews, but the author has an excellent title, appealing cover, and the content is top notch. Well done. This is everything a Kindle book should be, clear, well formatted, well written, and a personal style. (5 Star) Josh
